### Ingredients List

**Butter:** a dairy product composed of the higher-fat layer skimmed from the top of raw milk before homogenization, then heat-treated (pasteurized) to destroy bacteria.

**Beeswax:** (aka bees wax) a tallow-like substance that honeybees secrete and use to build honeycomb cells in which the young are raised and honey and pollen are stored.

**Rosin:** a solid form of resin obtained from pines and some other plants, mostly conifers.

**Kukui Nut Oil:** an essential oil pressed from the nut of the Kukui tree, the state tree of Hawaii. This highly penetrating oil was treasured by ancient Hawaiians for its soothing and healing properties. It has historically been prized as nature's relief for dry skin and for calming sensitive, irritated, and extremely itchy skin.

**Organic Essential Oils:** derived from essential oils of various plants which have been demonstrated to be beneficial for skin care. These plants have been produced under the authority of the Organic Foods Production Act: the use of materials and practices that enhance the ecological balance of natural systems and that integrate the parts of the farming system into an ecological whole. In ARMSTRONG SKIN AID we use the following Organic Essential Oils:

**Lemon Grass Oil:** Psoriasis Stage 1, Acne

**Sweet Orange Oil:** Psoriasis Stage 2, Eczema, Bug Bites, Poison Ivy, Calluses, Skin Irritations, Extra Dry Skin

These ingredients in their most pure and natural state, mixed in the exact proportion and prepared in a manner that has been refined and improved through four generations of use, result in a winning formula for the treatment of many skin conditions and disorders. Why?

1. These ingredients include some of the best *natural antiseptics* and *natural antibiotics* known to today's natural product specialists.
2. These ingredients are natural *emulsifiers, humectants, and emollients* and thus soothe the skin and help it retain its natural moisture.
3. Some of these ingredients are a natural source of *Vitamin A*, which enables the product to be easily absorbed into the skin, increases the rate of skin cell turnover, and temporarily increases skin *Collagen*. (The most abundant protein in humans, Collagen is responsible for skin strength and elasticity.)
4. Several of the ingredients in ARMSTRONG SKIN AID products naturally contain *Abietic Acid*, which is excellent for the regulation of *sebum* ( a semi-fluid secretion of the sebaceous glands consisting mainly of fat, keratin and cellular material and the accumulation of which contributes to the cause of *Acne*). Abietic Acid is also a natural emollient, soothing and softening the skin and relieving inflammation.

Although many skin disorders have no permanent cure and may be affected by environment and other medications, their symptoms and effects can be effectively controlled and diminished with the use of ARMSTRONG SKIN AID.
